About University of Swabi

The University of Swabi is one of Pakistan's newly established universities with excellent teaching and growing reputation for quality education. The University of Swabi was established in 2012. It is based in the city of Swabi, at a 10 min drive from Swabi motorway interchange, where North-West of the country meets the South-East. The location of the university is of great importance as it is at a distance of about 100 km from the capital city Islamabad. This provides a unique opportunity to attract students and faculty not only from Swabi but also from the adjoining districts of Khyber Pakhtunkhwa, Punjab and capital territory. The famous Indus River is just 2 km away while the Kabul River is about 20 km from the university campus. Moreover, the historical Hund museum also lies in the vicinity of the university (at 6 km distance). The University of Swabi is a full-fledged public sector university which offers undergraduate and postgraduate courses in 28 teaching departments, seven of these departments also offers M. Phil and PhD Programs.

About the Conference

Dengue and emerging viral diseases are amongst the global issues, the conference will cover several aspects that favor their proliferation. The conference will provide a global forum for researchers, academicians and health professionals to discuss critical issues regarding these viral diseases. The conference will also provide opportunities for networking and making collaborations amongst different researchers/research groups within the country and across the globe.

Objectives of the Conference

- To bring together leading academic scientists, researchers and research scholars.
- To facilitate the exchange of ideas and information.
- To provide them a platform for discussion on the outbreak of dengue and other emerging viral diseases in Pakistan.
- To discuss modern strategies for prevention and control of dengue and other emerging viral diseases.

Who can participate?

- R&D scientists
- Health professionals
- Policy makers
- NGOs personnel (MSF, WHO, WWF etc.)
- University faculties
- Research Scholars
- Students

Call for Papers/Abstracts/Posters Presentation

High quality papers, abstracts and poster are encouraged to submit till 20th February, 2018. Full length papers, after acceptance, will be published in the "Swabi University Journal" or any other HEC recognized journal. Abstracts and full length papers should be formatted according to the selected journals. The body text of posters should be in Times New Roman format with the dimension of 1*1.2 m.

Themes for Papers/Abstracts/Posters Presentation

- Fatalities associated with the recent outbreaks of dengue in Pakistan.
- Highlighting issues that favor the spread of dengue.
- Planning strategies for better management of hospitalized patients.
- Recent developments in the therapeutics for dengue and other emerging viral diseases.
- Advanced strategies for the control of Vectors and habitat manipulation.
- Recent advances in vaccine development for dengue and other emerging viral infections.
